

Paper cut out/doily

For lace patterned lantern craft

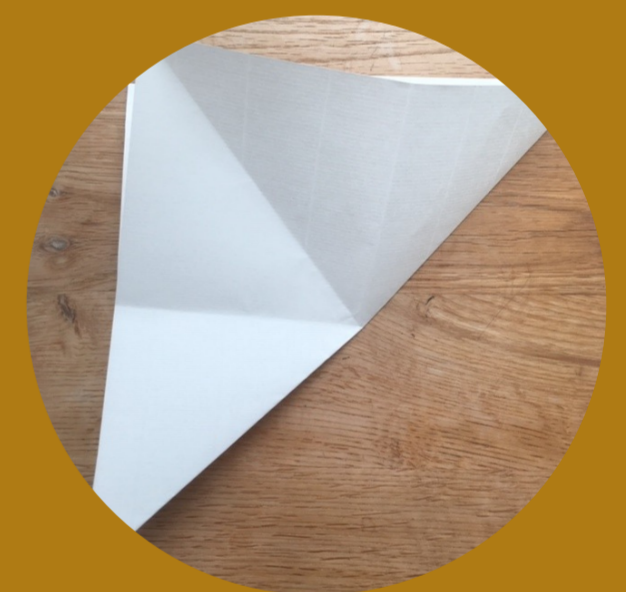

You will need: a piece of plain white paper, pencil and scissors

STEP 1: If the paper is rectangular, make it square by folding over one corner of the paper and cutting off the rectangular piece left over

STEP 2: Fold over the square piece of paper to make a large triangle. Then fold it twice again. Always keep the closed edge in the middle.

STEP 3: Draw a curved line either side of the folded triangle and cut out through the layers of paper

STEP 4: cut out a circle or pieces from the edges for a more detailed pattern. Open out the paper

Use instead of a doily to make your lace-pattern lantern (see separate instructions)
